China Cry - Song

February 3, 2021

My China Cry is a mysterious melody that came forth during the time that China was discovered on both our borders, southern and northern. The whole feeling is about intrigue with an oriental flavor. Ezekiel gave it its name. Maybe China should cry because they did not succeed in steeling the election and bringing our country into civil war. Rather they now are faced with the dissolution of communism as people rise up to throw off the shackles they've been living under.
